## **Team Hammond Robotics**

### **NASA-sponsored FIRST team highlights**

For the entire ten-year history of Team Hammond Robotics, our participation in the FIRST Robotics program has been supported by many Hammond Businesses and individuals. From the beginning in partnership with the School City of Hammond, have been Beatty International and BEMCOR Inc and more recently PEPSI and NASA have helped with funding our team. Since our first year of involvement in 1996, Team 71 has won four National Championships 1997, 2001, 2002 and 2004. We have on the average 24 students from four different Hammond high schools that participate each season. We participate in many events state wide all year and currently have an exhibit at the Visitors Center in NW Indiana.
